

# HOLIDAY SAFETY TIPS

Check your holiday lights – twice. Replace any strand that is damaged or has frayed wires.

When decorating outside, only use lights and extension cords that are marked for outdoor use.

If you purchase a live tree, be sure to keep the stand filled with water. Heated rooms can dry out trees creating a fire hazard.

Never leave a space heater unattended and ensure it's a safe distance from curtains or other flammable material.

Don't overload wall sockets or extension cords and follow instructions for connecting multiple strands of lights.
